CALL FOR PRESENTERS

ANMTA SPRING & FALL CONFERENCES

ANMTA is currently accepting speaker abstracts for its Spring and Fall conferences. These events attract over 100 telecom executives, managers and staff.

We are looking for solutions-based case studies from telcos or vendors who can discuss the issues listed below, or current issues presenters feel pertinent to today's needs. Abstracts must explain in some detail what the speaker will address and what the audience will learn. ANMTA avoids product-specific presentation, but generic product or topic presentations are welcomed!

PLANT

Fiber Testing Methods
DSL
Copper Testing Methods
Spread Spectrum
Central Office Equipment
Special Circuit Terminology
Grounding
Special Circuit Testing
LAN/WAN/MAN
